**Hospital care in the
comfort of your home.**

life | Hospital
at Home

Life | Hospital at Home is an innovative care model that provides hospital-level care at the patient's home, replacing the need for hospitalisation.

We offer medical and paramedical care, delivered by a qualified team, in the comfort of your own home.

Our multidisciplinary team, dedicated to serving the patient, includes:

- A Hospital at Home Manager
- A Medical Coordinator
- A Nurse Team Leader
- Nurses
- Health Care Assistants

Our healthcare professionals work together to provide tailored support at home, offering patients and their families peace of mind.

OUR 4 CARE PLANS

We tailor the care plans to your needs by offering a visit from the coordinating doctor, daily care provided by a nurse and a caregiver, as well as comprehensive support for the patient and their family.

Intravenous
perfusion

Post-operative
care

Palliative
care

Complex
nursing care
